PROTECTING COMMERCIAL BUSINESS

Protecting your place of business with a ULC listed & monitored alarm system is a sound investment. CSI will help to alleviate any confusion over alarm systems by installing a user friendly system and provide you with complete training of the systems operations. We are factory trained and certified with no less than three

brands of manufacture and will always recommend the right system for each application. Products include hard wired & wireless, and we carry both commercial and industrial products. For companies that require full integration, we can easily add together the alarm features with that of a PC based card access system.
